LIFE IS A JOURNEY

Beautiful fragrances are our passion, that is why we are happy to present an innovative way to refresh your world of fragrances.

Invame is a new car perfume brand, born out of passion for beautiful fragrances. Made in Poland, created by the best European perfumery specialists.

The latest technologies, allowed us to obtain a unique fragrance enclosed in a polymer. Designing the fragrance, we took into account an

exclusive look, long-lasting fragrance release and the safety for the car's upholstery and cockpit.

Reaching for the original Invame collection, we want our fragrances to make your time pass by, while traveling by car. We want the air to revive your senses. Thanks to the functional

attachment with a simple universal clamp, it can be easily positioned on the air vents of any car, both vertically and horizontally.

When you turn on the airflow, it will release the perfume smell. The air enters the center of the fragrance, distributing beautiful and modern fragrances.

PREMIUM ALUMINIUM

ORIGINAL CAR PERFUMES

Aluminium Cover

Yet, the scent itself and the material in which we place it is not enough – we also need a subtle, elegant case that will match the interior of our car. That is why we chose aluminium as one of the first materials we've ever used.

It seems obvious to us that a fragrance cover made of aluminium, as a metal commonly used in car interior decorations, would perfectly blend in with the other elements of the dashboard and air vents.
